QUERIES EVENT MANAGER HAS?

- If there is a query in the audience and if I am not available or any of my team is not present how will that be managed?

- Should I create multiple WhatsApp groups?

- Need to send itinerary to all members?

- How to keep my audience engaged when a CEO/CTO/Department head is speaking?

- How do I manage communication with multiple groups of people within the same event?

- How will i make everyone read the itinerary?

- How will i create a hype for an event?

- To show agenda?

FEATURES THAT EMPOWER YOU TO MAKE A DIFFERENCE

Managing an event can be incredibly daunting, so you need a solution that are not only extremely intuitive but also has the breadth of capabilities you need to ensure your event goes off without a glitch.

REGISTRATION

- **Whitelisted Users**

Only users with whitelisted Email IDs will be able to register on the application.

- **Field Customization**

All fields can be customized except Email ID and Mobile No.

- **Verification**

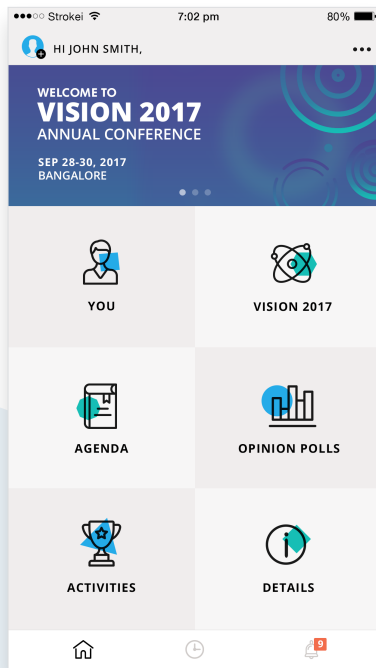

Mobile No. would be necessary for OTP verification purpose.

A screenshot of a mobile application registration form for 'Vision CONFERENCE 2017'. The form is titled 'GET STARTED' and includes a note 'All fields are mandatory'. It contains input fields for 'First Name' (John), 'Last Name' (Smith), 'Email ID' (johnsmith@company.com), 'Mobile No.' (9820198201), and a 'Select City' dropdown menu (Mumbai). A green status bar at the bottom indicates 'All fields populated'. At the very bottom, there is a link: 'Already a Registered Member? LOGIN HERE'.

A screenshot of a mobile application verification screen. It features a back arrow, a 'SUBMIT' button, and the heading 'VERIFY IT'S YOU'. The text states: 'One-time password has been sent to your mobile no.' Below this, there is an 'OTP' field with the value '4567'. At the bottom, there is a 'RESEND OTP' link.

HOME PAGE

- **Layout**

This is a basic layout for your application's homepage.

- **Banner**

Top banner space can incorporate multiple banners. Banners can be changed at any given point in time from the back-end to display the necessary information.

- **Animations**

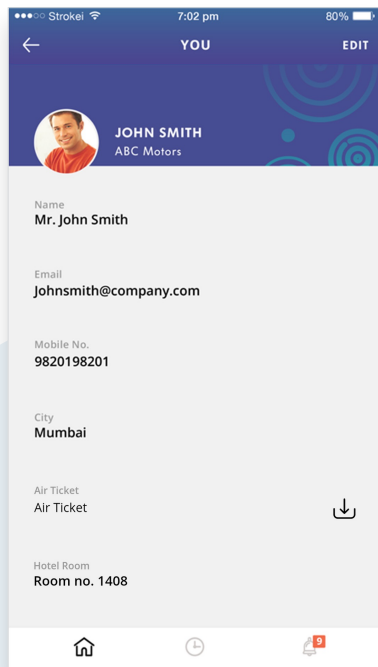

Features and their icon shape animations are customizable & can be added/removed at any given time.

- **Icons**

The home page consists of icons with access to every Feature, Recent Activity tab & Notifications.

PROFILE

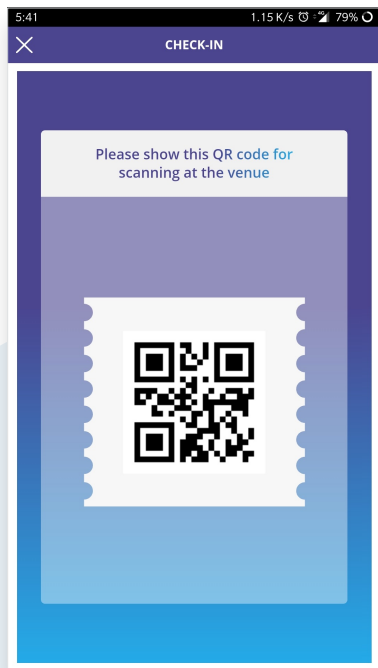

- **Travel**

Air Ticket Download, Travel Schedules,
Hotel Information & Maps.

CHECK-IN

- **QR code**

The unique QR code can be utilized for multiple sessions without regenerating a new one.

- **Access**

Check-in feature allows you to grant access and keep a track of all attendees at your event using a unique QR code in every attendee's app which is scanned through the admin panel.

RECENT ACTIVITIES

- **Quick View**

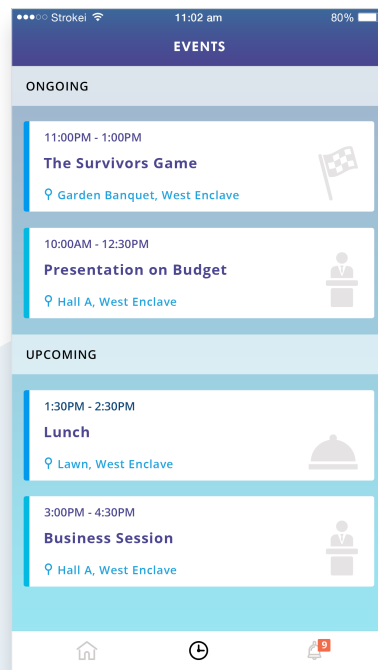

Users can access information of ongoing and upcoming events through this tab as well.

- **On the Go Services**

Last-minute changes in schedule can be updated from the back-end if required.

- **Enables Smooth Transition**

Recent Activities tab display's ongoing and upcoming activities of your event, enabling the users to stay updated with the event flow and transition smoothly between them.

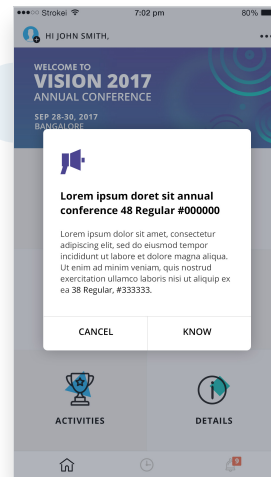

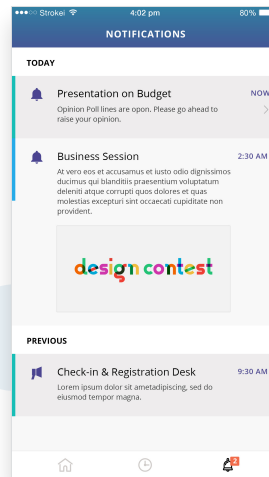

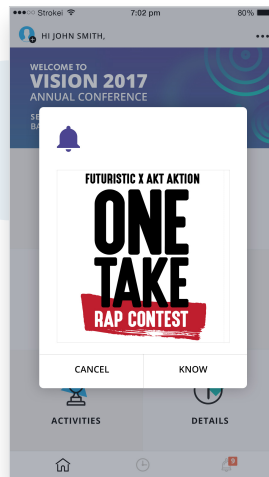

NOTIFICATIONS

- **Push Notification**

Push Notifications displayed can be sent in text and with images (not gif).

- **Action Buttons**

The push notifications can have required action buttons to navigate or deep link the user to the relevant page or section.

ABOUT THE EVENT

- **Banner**

Please note that this page only holds space for one banner. We can still have multiple images hosted post the banner section.

- **Cloud Editing**

Information content can be altered at any given point in time through the Huddle back-end.

- **Event details**

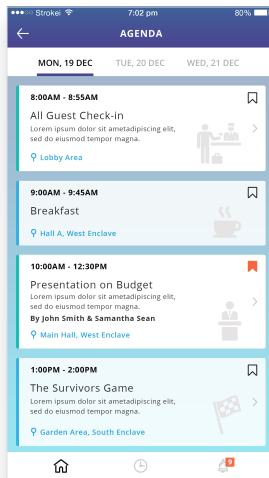

About The Event page contains a static banner displaying information of your event and a long scroll description section which allows you to feed limitless content. The format of the description is still customizable.

AGENDA

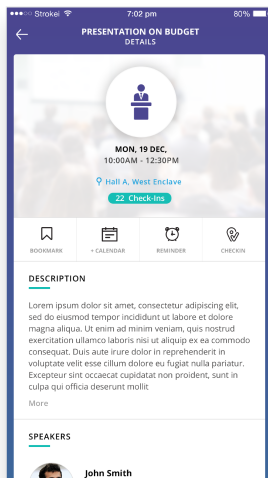

- **Date wise Information**

Agenda section will include all date wise information of upcoming, ongoing & completed activities & sessions.

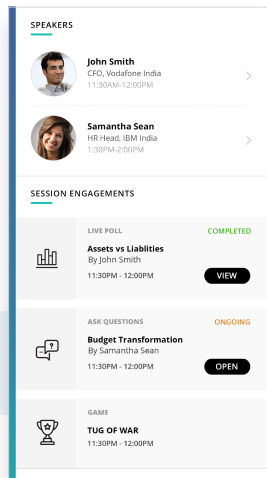

- **Deep Linking**

Documents uploaded by the speaker can be downloaded by users via deep linking.

- **Check-in features**

Users can bookmark, add it to their calendar, and set reminders for each session. Users can confirm their attendance to each session via check-in feature.

- **Session Detail**

Each session will have a detailed information page with information of the session, the speaker details, venue, time and engagements.

POLL

- **Live Polls**

Polls can start simultaneously with the event or be scheduled to start at a specific time.

- **Poll Details**

Polls can also be associated with specific sessions and speakers.

- **Result Projection**

Live poll can be projected on a screen through our admin panel.

- **Live Response**

Get real-time opinions on topics through the live poll feature.

The screenshot shows a mobile app interface for a poll. At the top, it says 'POLL' and 'ONGOING'. Below that, it displays 'AUG 24' and 'General Poll'. A description follows: 'You can add a small description to the poll being conducted in this section'. There is a 'START' button on the right. The bottom navigation bar shows icons for home, clock, and notifications.

The screenshot shows a mobile app interface for a 'GENERAL POLL'. It has navigation buttons for 'PREVIOUS' and 'NEXT'. The question is: 'Given the technological advancements and digital interventions in the event management industry, we believe event management applications are the next big step in this industry, how strongly do you agree to this?'. Below the question, it says 'Please select an answer choice'. There are five radio button options: 'Strongly Agree' (selected), 'Agree', 'Neutral', 'Disagree', and 'Strongly Disagree'. A 'SUBMIT' button is at the bottom.

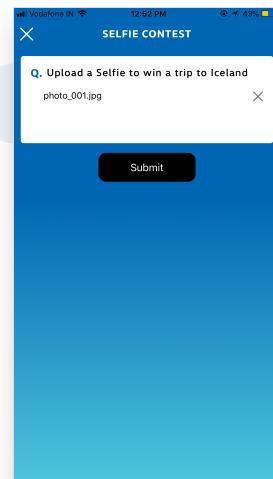

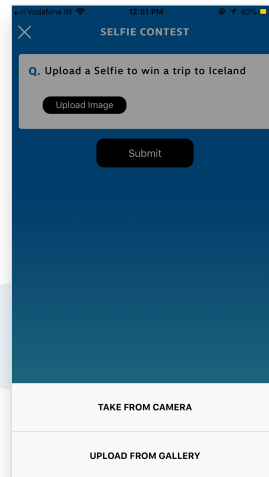

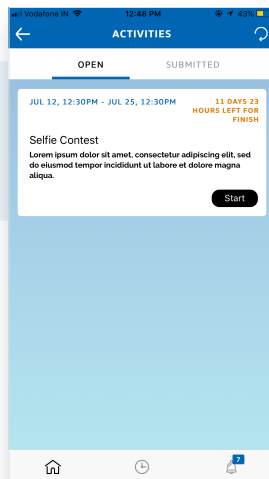

CONTESTS

- **Audio & Videos**

Users can access the contest feature and upload their images or audio or videos as their entry submissions.

- **Selfie Contest**

Post or prior to an event a selfie contest can be conducted.

Please note video file have a limit of 50MB max (around 15 sec) as this will flood the server sizes.

GALLERY

- **Moderator**

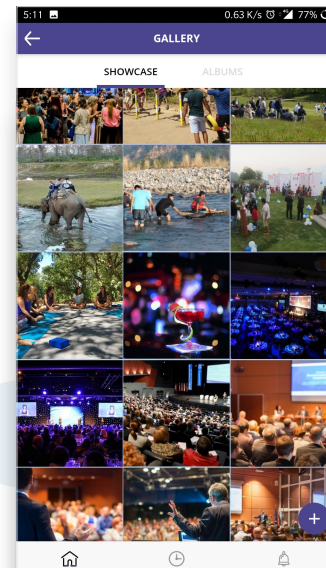

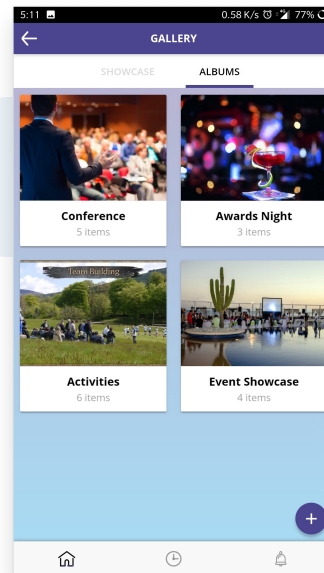

The admin panel enables you to review and approve images that get published on the app.

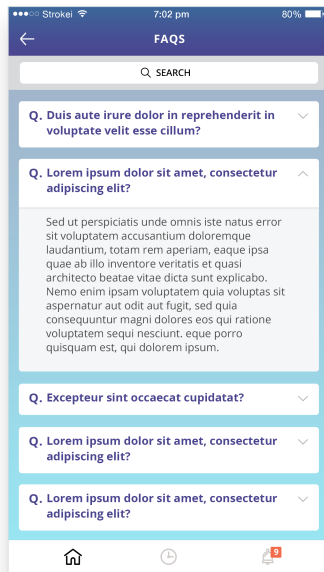

- **Custom Album Names**

It allows you to create and segregate images into albums for your event.

- **Personalized Gallery**

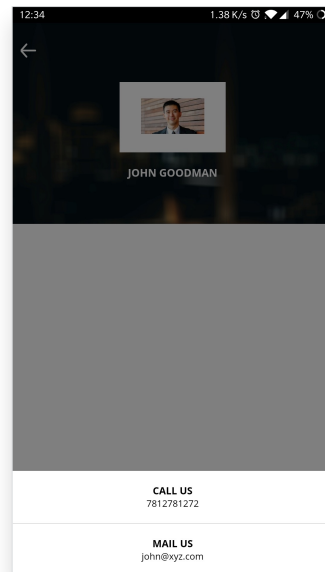

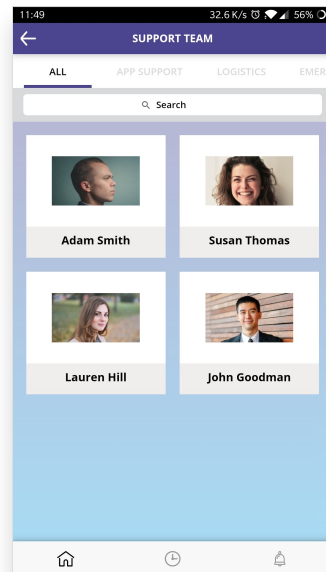

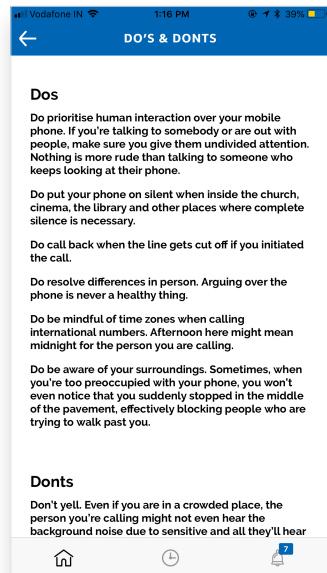

This feature allows you to create your very own personal event gallery, where all attendees can share moments captured by them for all to see.

RELIANCE

and counting...

“We go the extra mile to make sure you get the most out of your event. We’ve got you covered every step of the way, our team working alongside yours: before, during, and after your event, from input & app design to on-site moderation and support”

01

DURING THE EVENT: SUPPORT

- **On-site Support**

On-site support team with technical and operational know-how to make sure everything surrounding the use of your app is handled smoothly.

Cloud server and On-site server (Optional)

On-site server makes sure that your delegates have the best possible event experience.

- **Live Content Update**

Meetbot is the best way to communicate with your audience. When changing content in the platform, it's immediately made available to your delegates.

Push notifications are another great way to communicate with your audience. Just type in a message and hit send or let our support team handle this.

Interactive notifications help redirecting the user to the right information

02

AFTER THE EVENT: EVALUATION & FEEDBACK

Our platform provides you with statistics and insights on app usage. Get important info like the number of app users and which platform they used (iOS vs. Android).

See which features were the most popular or check out the number of push notifications that have been received or opened.

The platform also allows you to export this data to the relevant format.
